## ComplyRelax's Updates

## Notification: Web & Email alert for various activities

You may now get web and email alert for various activities occurring on your dashboard for example: task creation, updation, leave related notification, client related notification etc.

You can define your requirements in the notification settings for sending web and email alert to specific users for specific activities.

System will automatically send notifications by web and email to the selected users.

Click on the Settings tab from left main menu

Select Notifications from app settings menu as shown in the figure. Update the settings of various activities by clicking on the pencil icon.
